PSC SHAPING THE FEDERAL IT MARKET

Success in the more than \$90 billion federal IT market requires overcoming obstacles to deliver innovative solutions and commercial best practices to government customers. As the premier trade association serving the government technology and professional services industry, PSC provides:

Advocacy - Shape federal acquisition policy and legislation to improve technology and contract innovation.

Market Intelligence - Gain access to unparalleled members-only business intelligence.

Executive Networking - Network with senior government and industry officials through programs and events.

Brand Exposure - Showcase your brand and executive team as industry thought leaders.

Federal technology leaders value their PSC membership because PSC is the only trade association exclusively composed of contractors that is focused on the federal government.

PSC TECHNOLOGY COUNCIL

PSC's Technology Council advocates on the key issues impacting the federal tech market:

- Security Clearances
- Cloud Computing
- Contracting Vehicles (FedRamp, OTAs)
- Artificial Intelligence
- "As-A-Service" Acquisitions
- Cybersecurity Requirements
- NDAA

- TMF Funding
- o MGT Act
- IT Modernization
- Category Management

The Technology Council's Key Goals and Objectives:

- 1. Shape key procurements to promote government access to innovation and the use of commercial best practices.
- 2. Proactively influence federal policies to improve IT acquisition and cybersecurity.
- 3. Promote technology and innovation to achieve agency mission results, including through PSC thought leadership, speaking engagements, testimony and social media.
- 4. Facilitate connectivity and collaboration with government technology leaders.

MEMBER EXCLUSIVE OPPORTUNITIES AND RESOURCES

Vision Federal Market Forecast delivers key insights and quantifiable assessments of agency budgets, programs and priorities in a rapidly changing environment, while also providing exclusive, face-to-face meetings with government agency planners and decision makers.
